ABOUT ME

First-rate Informatics Engineer with +9 years of experience offering outstanding support to users and companies of various levels in different countries. Passionate about web development and seeking to grow in the role of a web developer by using my React, Redux, JavaScript, HTML and CSS skills to deliver coding excellence. Ambitious problem solver with a passion for online businesses and would like to join a team of like-minded developers. Constantly striving to improve myself and enhance my skills in technologies.

SKILL SET

- Experience with **HTML5, CSS3, SASS, React, Redux, JavaScript, jQuery, WordPress, and Animation Libraries (GSAP, Animate.css, Bounce.js, CSSShake...etc).**
- Search engine optimization SEO.
- Version control GitHub.
- Responsive design development.
- Have excellent skills in problem-solving.
- Gather and refine specifications and requirements based on technical needs.
- Strong Understanding in sketching and photo manipulation.
- Good understanding of server-side programming using Node.js and Express.
- High knowledge in object oriented programming like C#.
- Database Tools: MongoDB and Microsoft SQL .
- Self-learning.
- Maintain computers, tablets, mobile phones, servers, operating systems and networks.
- Projects Management Agile and Jira.
